

For every girl

We want to live in a world where every girl will grow up to have:

- access to quality education
- appropriate sex education teaching her essential life skills in taking responsibility for her own sexuality
- information on how HIV is transmitted and how it is not transmitted
- access to confidential voluntary counseling and HIV-testing and know her HIV status
- access to the best and most effective HIV treatment if she is HIV-positive and freedom to choose whom to tell about her HIV status
- skills to negotiate condom use and access to low cost female and male condoms
- knowledge on how to prevent unintended pregnancies and access contraception suited to her needs
- freedom to choose when to marry and whom to marry
- freedom to choose when and if to have children, regardless of her HIV status
- access to health facilities that would help her survive childbirth when she is old enough to have children
- access to regular screening and treatment for cervical and breast cancer
